

ABSTRACT

Connector mounting apparatus

5 Apparatus for mounting a connector part of a  
connector for use in an underwater or severe environment  
to an installation, the apparatus being adapted to be  
secured at a radially inner region thereof to the  
connector part and at a radially outer region thereof to  
10 the installation, and the apparatus comprising a  
flexible portion extending in the circumferential  
direction for providing compliance between the connector  
part and the installation.

*Elastomer*

*The flexible portion  
is within an  
outer metal part  
having holes for  
bolts for mounting  
to a bulkhead*
